I.) Reason why we choose this project :

First reason

- This project is the new taste and the new thing in which we have never done before. So we want to research and understand deeply.

Second reason

- It has interconnected to financial engineering applying to financial database management.

Third reason

- The manufacturization and innovation of this project may lead us to know deeply on mathematical application. .

II.) Introduction to taxation :

Taxation is the imposition of compulsory levies on individuals or entities by governments in almost every country of the world. Taxation is used primarily to raise revenue for government expenditures, though it can serve other purposes as well.

III.) Real Estate Description

Real estate is property consisting of land and the buildings on it, along with its natural resources such as crops, minerals or water; immovable property of this nature; an interest vested in this an item of real property, buildings or housing in general.

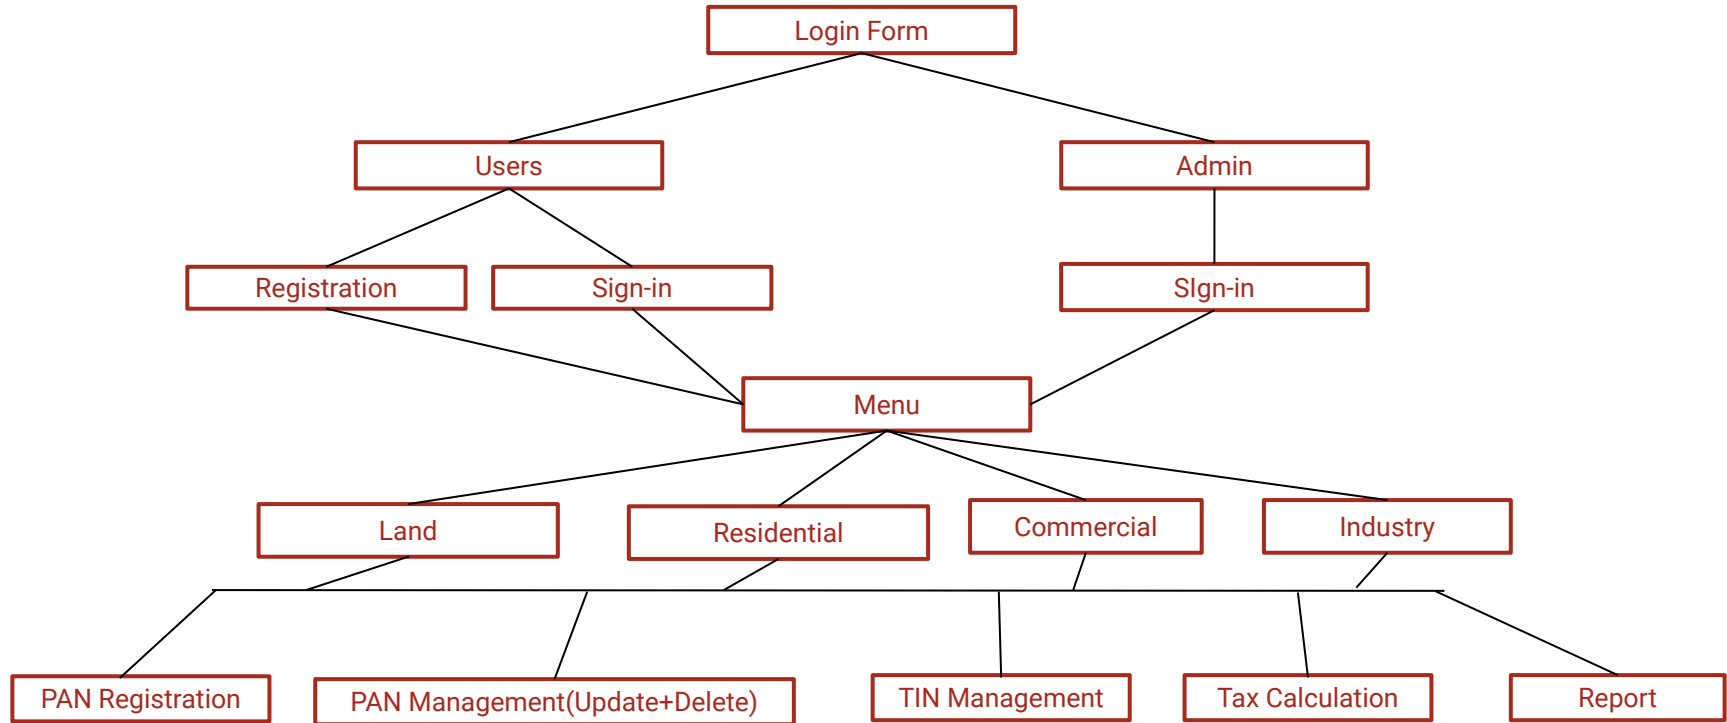

IV.) Attributes :

There are some attributes that we mention :

- ID
 - Name of company
 - Company address
 - Phone number
 - Category of real estate
 - Location
 - Tax percent
 - Business type(rent or purchased)
 - Income
 - Outcome
 - Balance
 - Date
-

V.) Processing Flow Diagram

VI.) Steps of Project

Step 1 :

- Data collection

Step 2 :

- Data summarization and analysis

Step 3 :

- Connect to database
- Implement code

The End
